DETAILED ACTION

1. This action is in response to applicant's amendment received on 11/08/07.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1 and 32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification discloses an effective rotation of the cutting head relative to the handle of 120 degrees in one direction or 240 degrees in the other direction relative to the axis is not sufficient to one of ordinary skill in the art to make and use the invention. Applicant needs to illustrate in *detail in the specification and drawings every angle* that comprises the effective rotation and every direction claimed.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 2, 19-21, 32 and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 32, it is not clear what “an effective rotation of the cutting head of 120 degrees in one direction or 240 degrees in the other direction relative to the axis” encompasses.

Claims 21 and 33, “horizontal” is indefinite because it is not relative to any specific point.

Allowable Subject Matter

6. Claims 26-31 are allowed.

Response to Arguments

7. Applicant's arguments have been fully considered but they are not persuasive. Applicant's remarks based on the Figs. 2 and 4 are not sufficient to one of ordinary skill in the art to make and use the invention. In response to applicant's argument that the term horizontal is clearly defined on the specification. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Also, the term horizontal in the claims is not clear if is directing to a horizontal portion of the device or to a horizontal plane.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3724

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
